

Residential Camp

Over The Wall's residential activity camps are an opportunity for children, young people and families to get away from home and the day-to-day pressures of life. They offer a medically and physically safe environment that allows young people affected by health challenges to step outside of their comfort zones, establishing friendships and build their confidence through meaningful and exciting activities.

Health Challenge and Siblings

At a Health Challenge and Siblings Camps, campers can enjoy a variety of different activities such as Archery, Climbing, Zip Wire, Arts & Crafts and Games whilst in teams of a similar age.

Families

At a Family Camps, there will be a mixture of high and low intensity activities for all members of the family to enjoy. This is a great opportunity to spend quality time together whilst connecting with other families in similar situations.
